Puppy_love

Relationships, Prediction, and Group Comparisons

You have entered a numeric dependent variable, one or more categorical (nominal/ordinal) independent variables, and one or more numeric control variables. Hence, an ANCOVA seems to be a good option for you! In order to run this analysis in jamovi, go to: ANOVA > ANCOVA

- Drop your numeric dependent variable in the box below Dependent Variable
- Drop your nominal/ordinal independent variables in the box below Fixed Factors
- Drop your numeric control variables in the box below Covariates

Scatter Plots of Bivariate Relationships - Dependent/Independent Variables

Scatter Plots of Bivariate Relationships - Dependent/Control Variables

ANOVA

ANOVA - Puppy_love

	Sum of Squares	df	Mean Square	F	p	η^2p
Dose	12.8	2	6.38	1.98	0.158	0.128
Residuals	87.1	27	3.23			

[3]

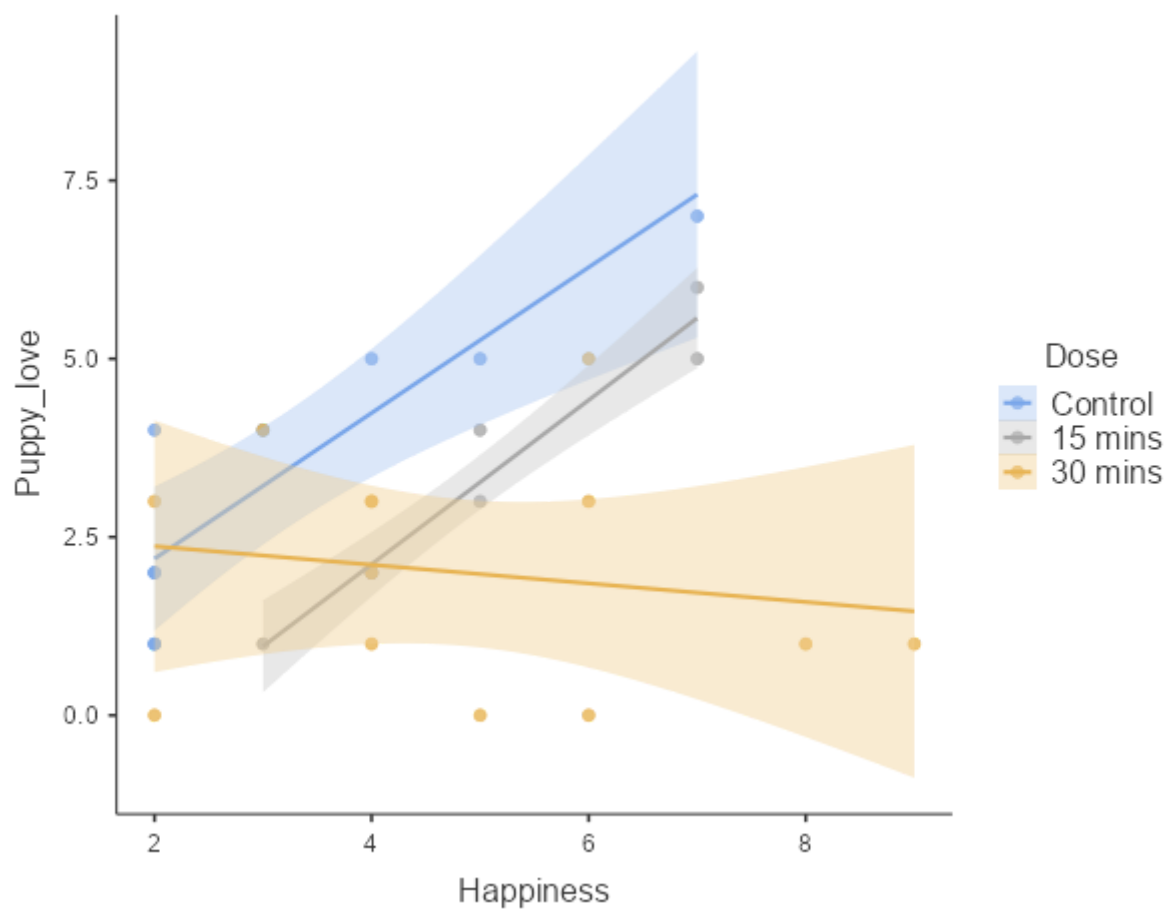

Assumption Checks

Normality tests

	statistic	p
Shapiro-Wilk	0.941	0.096
Kolmogorov-Smirnov	0.185	0.258
Anderson-Darling	0.624	0.095
